WE are always glad to have visitors.

HOURS.

8 A M to 7 P. M. Week Days,  
8 A M to 9 P. M. Sundays.

We are across the street from the Mt. Washington School playground. The following is a rough map to guide you to our place.

By far the largest collection of Cacti and other Succulents in the greater Kansas City area is on display at our place. We are in no way connected with any other cacti dealer in the Kansas City area.

TERMS All plants, except specimen plants listed as not prepaid in list, are prepaid to you if your order is \$ 1.00 or more. Your plants will be packed and sent by parcel post to you. On specimen plants we pack them and send them Express collect unless you state otherwise. NOT prepaid in Canada.

THIS LIST CANCELS ALL PREVIOUS RETAIL LISTS.

WARRANTY We guarantee safe arrival at any time of the year. Your plants are guaranteed to live for two weeks or we send you other plants free. All of our shipments will pass horticultural inspection. We want you to be satisfied.

Please mention one or two alternate choices if possible in case an item is out of stock. All items are offered subject to stock on hand. Some items are limited.

We are always glad to have visitors.

8 AM to 7 P.M. - Week Days  
8 AM to 5 P.M. - Weekends

To see across the street from the U.S. National Academy of Sciences, the following is a rough map to guide you to the building.

By the way, the largest collection of seeds in the world is on display at our place. If you are interested in any other seeds, please see the Kansas City office.

NOTE: All plants, except special plants, are sold in 1-gallon pots, and shipped to you in your order for \$1.00 or more. Special plants are sold in 1-gallon pots, and shipped to you in your order for \$2.00 or more. On special plants, the shipping charges are extra. Please see our list of plants for more information. We want you to be satisfied.

NOTE: We guarantee the arrival of all plants in good condition. Your plants are guaranteed to live for the term of the contract. All of our shipments will be insured. We want you to be satisfied.

Please mention one or two alternate plants if possible. We will do our best to get you the plants you want. All items are offered subject to stock. Some items are not available.

Culture of these interesting plants is quite easy if a few simple directions are observed. They are mostly native to desert climates and grow in coarse rocky soil, usually on sloping or mountainous country. These regions are subject to heavy rainfall at some seasons of the year, but often with long periods of drouth in between. The plants absorb water quickly through the roots when it is available and store it in the succulent tissue so that they can maintain like for a great period of time without water.

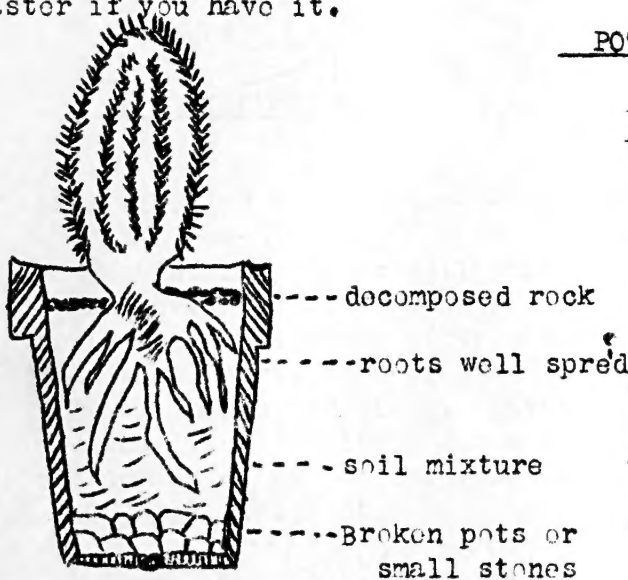

Clay pots have a large amount of surface exposed to the air and dry out quickly, hence under cultivation cacti require water more frequently than they would receive in their native habitat.

#### SOIL

It is a very important factor in cacti growing. A good mixture we recommend is 1/3 leaf mold, 1/3 very rich garden loam, 1/3 sand and a little charcoal and old plaster if you have it.

#### POTTING

Use pots that fit the plant comfortably do not try to put a plant in a pot about  $\frac{1}{2}$  its size. Place some broken pottery or small stones in bottom to insure good drainage then fill with your soil mixture, tamping firmly about the well spread roots of the plant and allow the base of the plant to rest on top of the soil or cover only to the previous soil mark. The addition of a light layer of coarse sand or small gravel on top will add to the appearance of the plants and aid in aeration of the soil which is important. It will also control the growth of green scum or algae on the surface of the soil.

#### WATERING

They should be watered as often as the soil becomes dry. This may be daily in very hot weather or only once or twice a week in cooler weather. About every 10 days or two weeks with small collections it is a good thing to get a pan of water and set the pots in and let the water soak up through the hole in the bottom of the pot. Thus making sure the roots have some water.

#### SUCCULENTS

Require practically the same treatment as cacti except that they require water more frequently than cacti.

#### EPIPHYLLUMS

Are shade loving plants from tropical forests and require somewhat different treatment from the desert types. A good soil mixture is 1/4 good rich garden loam, 1/4 sand, 1/3 peat moss, and 1/5 well rotted manure. These plants thrive in lath houses in summer and inside in shade in winter.

---

WE HOPE YOU WILL GET AS MUCH PLEASURE OUT OF YOUR PLANTS AS WE DO.

ASSORTMENTS

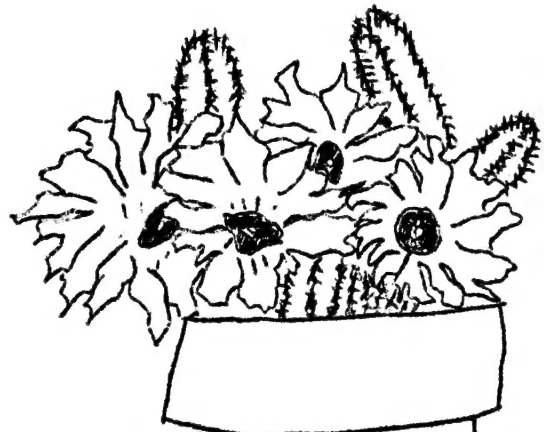

Aloe variegata

Col. A.  
5 Aloes  $1\frac{1}{2}$  to 4 in. plants-----\$ 1.00

These beautiful plants are an outstanding plant in any collection no matter what size. They are marvelous for putting in dish-gardens as backgrounds. Their distinct markings, some with sticky leaves, some smooth and highly variegated, etc. All 5 distinctly different. Don't pass this offer up.

Col. B.  
10 Cacti, labelled 2 to 4 in.-----\$ 1.00

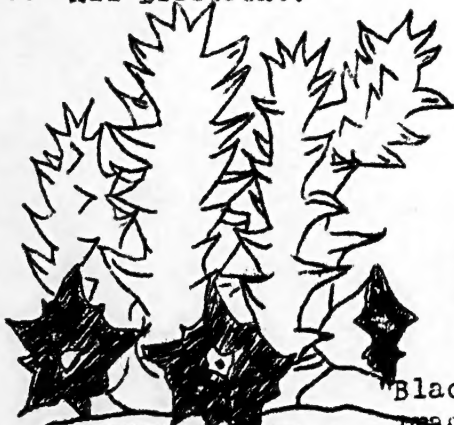

Are you just starting your collection or is your friend? This is a wonderful starter 10 different kinds of true cacti some tall some short, some wide and some narrow. All shapes and sizes. Haven't you a friend who likes cacti? who has a Birthday coming soon? Remember 10 Cacti for \$ 1.00 All Different.

Echinocereus pentaloophus  
(Texas lady finger)

Col. C.  
10 Stapelias all different-----\$ 2.25

These rare African plants with their beautiful star shaped flowers. Flowers you won't believe are real they seem to be just a picture placed by the plant. No one will believe they are real. A wonderful addition to any collection. 10 all different named.

"Black  
Dragon"

Col. D. HUERNIA PLENZIGII  
10 Succulents 2 to 4 inches-----\$ 1.00

Many varieties of shapes, and forms of these interesting plants. All colors, some tall, some short, some fat and some thin. No where can you get so wide a variety of these fascinating little plants. Don't miss sending for them.

HEDEREA melii

1. The first thing I noticed  
 when I stepped out of the  
 plane was the fresh air.  
 It felt like I had been  
 breathing stale air for  
 days. The sun was shining  
 brightly, and the birds  
 were chirping happily.  
 I took a deep breath and  
 smiled. I was home.

10 Succulents larger and rarer than D.  
Something to be proud of-----\$ 2.00

All ten different better class plants than  
Col. D. When you see them you will want more  
and more of them. They are wonderful.  
Don't forget 10 different Better ones-\$ 2.00

ADROMISCHUS cristatus

Col. F.

Echeverias 5, 3 to 5 in. Labelled-----\$1.00

These beautiful plants with their thick  
succulent leaves look like molded rocks,  
some green, some yellow, some blue-white,  
some almost violet. These plants make a  
wonderfull rock garden plant. However  
they are NOT hardy. Try some in your rock  
garden this summer and you will always want  
to have them.

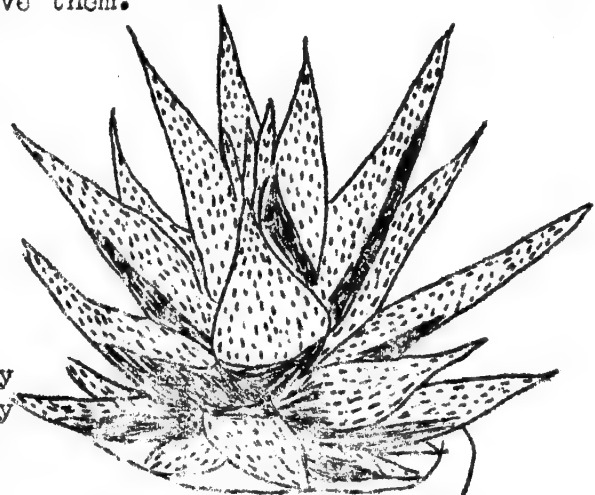

"Chenille  
plant"

ECHEVERIA pulvinata

Col. G.

5 Haworthias 2 to 3 inches Labelled \$1.00

These rare odd exciting plants with their  
delightfull markings some in almost designs  
on each leaf, some dark green with white  
markings on leaves, some light green with very  
thick leaves no white on them. All distinctly  
different plants. Are wonderful for pots in  
house if given sun. Sell for 25¢ to 50¢  
each. A real bargain. Get some.

HAWORTHIA subfasciata

Col. H.

10 varieties Hairy and rare plant group \$2.25

Some of the most lovely plants you have ever  
seen. Old man, powder puff, silver torch,  
bishops cap, etc. Many beautiful plants  
all well known plants. Nice seedling plants.  
OUR choice. Be sure to get this one.

<u>ECHINOPSIS hybrids</u> .	"Easter lily cactus" Round green bodied plants clusters freely large funnel shaped flowers white to pink. 1" to 1 1/2" \$ .15, Larger---	\$ .25, \$ .50
<u>ESCOBARIA busta</u> .	Nice growing plants-----	\$ .25
<u>E. runyonia</u> .	Nice size plants-----	\$ .15, Larger-----
<u>ESPOSTOA serricata</u> .	"Snow Ball" Covered with cotton. 1 to 1 1/2 -----	\$ .25
<u>FERROCACTUS lecontei</u> .	"Fire Ball" Red spined. Large plants not prepaid-----	\$ 1.00
<u>F. wislezenii</u> .	"Candy cactus" Stiff spines grows good, Large plants \$ .75, \$ 1.50	
<u>F. Vizcainensis</u> .	Globular bearing clusters of strongly hooked spines red and yellow flowers 1 to 1 1/2 inch plants-----	\$ .25
<u>GOLDEN BALL</u> .	See Echinocactus grusonii.	
<u>GOLDEN EASTER LILY</u> .	See Lobivia aurea.	
<u>GOLDEN STARS</u> .	See Mamillari elongata.	
<u>GRAPPE CACTUS</u> .	See Mamillari prolifera.	
<u>GRIZELY BEAR</u> .	See Opuntia arsina.	
<u>GYMNOCALCIUM anisitsii</u> .	A paraguayen species with white and green flowers. Rare plants 1 to 1 1/4 inches-----	\$ .25
<u>G. damsii</u> .	"Dams chin" Free flowering easy to grow. Flowers when small. Flowers all summer. 1 to 1 1/4 inch plants-----	\$ .25
<u>G. fleisherianum</u> .	Attractive with bands of dark and light gray Rare 1"---	\$ .25
<u>G. mihanovchii</u> .	"Striped Chin Cactus" Almost maroon in color at times. Free flowering nice blooming size plants-----	\$ .50
<u>HAMATOCACTUS setespinus</u> .	"Strawberry" One of the freest bloomers of all. Yellow flowers red seed pods. Very ornimental. Blooming size-----	\$ .25
<u>INDIAN HEAD</u> .	See Notocactus ottonis.	
<u>JELLY BEANS</u> .	See Mamillari fragilis minima.	
<u>LADY FINGERS</u> .	See Mamillari elongata minima.	
<u>LEMAIREOCEREUS benickei</u> .	Nice rooted cuts-----	\$ .50
<u>L. prunosus</u> .	"Powder Blue Cereus" Fast growing seedlings \$ .25, R. C. \$ .50, \$ 1.00	

<u>LEPHOPHORA williamsii.</u>	"Nescal Button" or "Sacred Mushroom" A peculiar, spineless blue colored cactus. Indians use the dried tops as a powerful narcotic-----	\$.25
<u>Lobivia atrolurens.</u>	"Cob cacti" Very nice little plants-----	\$.25
<u>L. corbula.</u>	A rare solitary plant with short spines and crenate ribs. The pretty flowers are salmon red about an inch across with recurved petals. Found on dry hills above Cuzco, Peru. Plants 1"-----	\$.25
<u>L. raridacantha.</u>	Cute little plants beautiful blooms 1"plants-----	\$.25
<u>L. hertrichiana.</u>	"Hertrich's cob cactus". This flowers when quite small the blossoms being as large as the plant and bright crimson in color. Very beautiful. Increases by division. Plants rarely exceed 2 inches across-----	\$.25
<u>L. thioanthus.</u>	A free growing species, handsome scarlet flowers-----	\$.25
<u>L. binghamiana.</u>	A free growing species bearing large, brilliant scarlet blossoms, The plants reach 2" in diameter and produce many offsets to form a cluster, Grows at 10,000 feet elevation in Peru.-----	\$.25
<u>L. neleana.</u>	1 inch plants-----	\$.25
<u>L. pentlandii.</u>	Bears rose-crimson blossoms, A small species with few spines. Flowering size plants-----	\$.25
<u>LOPHOCEREUS schotii.</u>	1 to 1½ inch seedlings-----	\$.25
<u>MAMILLARIA boscana.</u>	"Powder Puff" Like a bursting cotton ball with silky hair instead of spines. Easiest for beginners. Blooming size plants	\$.25,--\$ 1.00
<u>M. camptotricha.</u>	"Birds nest" Long flexible, straw-yellow spines 1 to 1½"	\$.25
<u>M. compressa.</u>	"Mother of Hundreds" A very pretty variety with curved white spines and triangular, flattened nipples. The flowers are brilliant ruby red covered with snow. Branches freely. Plants 1"---\$ .25, Larger \$ .75 to---	\$ 1.00
<u>M. elongata var. minima.</u>	"Golden stars" charming with its shining rich yellow, harmless spines. It's an orderly little plant that grows readily under all conditions. Clustered plants-----	\$.25
<u>M. fragilis var. minima.</u>	"Jelly Beans" New variety of the thimble Cactus with harmless snowy white spines. This dainty little species grows rapidly and quickly bears many arms. Each of which may be planted. Plants-----	\$.10
<u>M. parkinsonii.</u>	A beautiful white spined variety with rigid, reflexed, snowy centrals. Flowers pink embedded, in white wool. Collected plants	\$.25--\$ 1.50
<u>M. plumosa.</u>	"Feather Cactus" Plant which bears "feathers" instead of spines. One of the handsomest plants. Snowy white and entirely covered with feathery spines. Plants-----	\$.50 and---\$ .75
<u>M. celsiana.</u>	A light yellow spined variety having its spines in a regular spiral pattern. 1 to 1½ " plants -----	\$.25, Larger plants-----\$ .50
<u>M. sp. 692.</u>	Hasn't even been named yet. Get it before it is gone-----	\$.35
<u>M. sp. 693.</u>	Very limited supply-----	\$.25
<u>M. prolifera.</u>	"Grape Cactus" Fine clustering plant--	\$.25
<u>M. caput medusae.</u>	Fine branching plant-----	\$.25
<u>M. unciata.</u>	1 inch plants-----	\$.25
<u>M. umbrina.</u>	1 inch Seedlings-----	\$.25
<u>M. oreuttii.</u>	1 inch plants-----	\$.25
<u>M. xahniana.</u>	1 inch plants-----	\$.25
<u>M. durispinus.</u>	Brown colored spines-----	\$.25
<u>M. gigantea.</u>	Nice plants-----	\$.25
<u>M. heracantha.</u>	Nice plants 1 to 1½ inches-----	\$.25
<u>M. vaupellii.</u>	1 to 1½ inch plants-----	\$.25
<u>Paper Spined Opuntiam.</u>	<u>mystax.</u> 1 to 1½ inch plants-----	\$.25
<u>M. calacantha.</u>	Very nice plants 1 to 1½ inches-----	\$.25
<u>M. carnea.</u>	Very nice plants 1 to 1½ inches-----	\$.25
<u>MELOCACTUS intortus.</u>	1 to 1½ inch plants-----	\$.35

General description of the plant...  
The plant is a small, upright, herbaceous perennial...  
It has a basal rosette of leaves and a single upright stem...  
The leaves are lanceolate to elliptic, with serrated margins...  
The flowers are small, tubular, and arranged in a terminal raceme...  
The fruit is a small, rounded capsule...  
The plant is native to the mountains of the Himalayas...  
It is commonly found in alpine meadows and rocky slopes...  
The plant is a member of the family Asteraceae...  
The genus name is *Androsace* and the species name is *Androsace himalaica*...  
The plant is a member of the subgenus *Androsace*...  
The plant is a member of the section *Androsace*...

<u>N. leninghausii.</u> "Golden Ball" Entire plant is thickly clothed with soft, harmless old-gold colored hair. L inch plants-----	\$ .25
<u>N. ottonis.</u> "Indian Head" Free blooming cactus. Flowers for a period over many months during the summer. Small plants 1 to 1 $\frac{1}{2}$ inch-----	\$ .25
<u>N. scopa.</u> "Silver Ball" Handsome white spines. An elegant plant 1 $\frac{1}{2}$ inch	\$ .25
<u>OPUNTIA brasiliensis.</u> "Deaver Tail" Forms nice little trees.-----	\$ .25
<u>O. Cholla types.</u> Have about 5 or 6 different ones. Rooted cuts-----	\$ .15
<u>O. ursina.</u> "Grizzly Bear" Long white hairs. Cuttings from heavy plants	\$ .25
<u>O. mammillata cristata.</u> "Boxing Glove" Nice crested plants \$ .25, to---	\$ 1.00
<u>O. microdasy.</u> "Bunny Ears" Yellow glochid rabbit ears. Plants-----	\$ .10
<u>O. monacantha variegata.</u> "Joseph's Coat" Handsomely variegated. Plants--	\$ .25
<u>O. pad types.</u> Have about 5 or 6 types. Makes good back grounds-----	\$ .10
<u>O. rufida.</u> "Blind Bear" Red spines, looks like rabbit ears.-----	\$ .10
<u>O. vilis.</u> "Dwarf Tree Cactus" A miniature tree type. Barbed plants---	\$ .10
<u>O. glomerata.</u> "Paper Spines" Spines like strips of wax paper. Plants----	\$ .25
<u>RSTHBLANIS alamosensis.</u> A real beauty 6 to 8 inches. Rooted cuts-----	\$ .35
<u>OROGCEREUS trellii.</u> Another of the hairy types of Old Man-----	\$ .25
<u>PACHYCEREUS marginatus.</u> "Organ Pipe" 3 to 5 inches-----	\$ .25
<u>P. pringlei.</u> 2 to 3 inch plants-----	\$ .25
<u>PARODIA aureispina.</u> "Tom Thumb" Blooms when very small 1 inch plants---	\$ .25
<u>P. chrysacanthus.</u> Has straight, yellow, when very small, gold spines and paler yellow flowers Likes to rest during the middle of the winter 1"-----	\$ .25
<u>P. mutabilis.</u> Handsome orange-yellow flowers 1 $\frac{1}{2}$ to 1 in. plants-----	\$ .25
<u>P. sanguinaflora.</u> Flowers brilliant flashing ruby red and last many days. Flowers about the size of the plants. L inch plants-----	\$ .25
<u>P. scopacedes.</u> Orange yellow flowers 1 inch plant-----	\$ .25
<u>POWDER BLUE CEREUS.</u> See Notocactus Scopa.	
<u>SILVER BALL.</u> See Notocactus scopa.	
<u>SILVER TORCH.</u> See Cloistocactus strausii.	
<u>REBUTIA senilis.</u> With spines soft like hair. Clustering plants-----	\$ .25
<u>THELOCACTUS bicolor.</u> Glory of Texas. Blooming size plants-----	\$ .25
<u>TOM THUMB.</u> See Parodia aureispina.	
<u>TRICHOCEREUS chilensis.</u> 1 to 1 $\frac{1}{2}$ inch plants-----	\$ .25
<u>T. lamprochories.</u> 1 $\frac{1}{2}$ to 2 inches -----	\$ .25
<u>T. poco.</u> 1 $\frac{1}{2}$ inch plants-----	\$ .25
<u>T. spachignus.</u> 1 $\frac{1}{2}$ to 2 inch plants-----	\$ .25
<u>T. schinkendantzii.</u> 1 $\frac{3}{4}$ to 2 inch plants-----	\$ .25
<u>T. schafferii.</u> 1 $\frac{1}{2}$ to 2 inch plants. very nice plants-----	\$ .25
<u>T. thelogonus.</u> Very nice plants 1 $\frac{1}{2}$ to 2 inches-----	\$ .25

#### SUCCULENTS.

REMEMBER SUCCULENTS AS A RULE NEED MORE WATER THAN CACTUS.

<u>ADREMISCHUS cooperi.</u> From South Africa. Thick, spotted, brown leaves like plover's eggs. Very Rare-----	\$ .35
<u>A. clavifolius.</u> Nice plants-----	\$ .35
<u>A. cristatus.</u> From South Africa. Very green, downy, crenulate leaves in a pleasing rosette form. Nice colored plants.-----	\$ .25
<u>ADONIUM dedorum.</u> Tall growing species. With green-reddish-tinged leaves. Forming many heads. Branching freely. Tree hen and chick-----	\$ .10
<u>A. nickkii.</u> Nice plants-----	\$ .35
<u>A. victoria-reginae.</u> Wonderfully marked plant. Dark green with white lines running over the plant. A very pretty design. Plants \$ .50 to-----	\$ .75

<u>ALOE bravifolia.</u> Works well in small pottery-----	\$	.10
<u>A. beguinii.</u> Haworthia like plant, Warted-----	\$.25	.35
<u>A. ciliaris.</u> Climbing type-----		.15
<u>A. hanburyana.</u> "Scarlet Aloe" Fine rosettes.-----		.25
<u>A. humilis.</u> Makes lively clumps. Many teeth-----		.15
<u>A. mitriformis.</u> Makes lovely clumps. Lovely warted. Blossoms a dainty parasol. Each leaf has a central line.-----		.25
<u>A. nobilis.</u> One of the prettiest plants-----		.25
<u>A. parvibracteata.</u> "Barber Pole" Very nice plants-----		.25
<u>A. spinosissima.</u> "Spider Aloe" Beautiful bluish green, long toothed, giving a feathery look. Scarlet blooms-----		.25
<u>A. striata.</u> Red-edged plants-----		.25
<u>A. variegata.</u> The most popular and unique. Noted for its variety of comon names Parrot, whip-por-will, Pheasant's Brest, Tiger Cactus, etc. -----		.25
<u>ARIBS TURBEN.</u> See Crassula hemispharica.		
<u>BARBER POLE ALOE.</u> See Aloe parvibracteata.		
<u>BLACK DRAGON FLOWER.</u> See Huernia penzigii.		
<u>COTYLEDON hybrids.</u> Several varieties mixed each-----		.25
<u>CHEIRIDOPSIS candidissima.</u> Beautiful, rare species. Small clumps of silvery gray leaves. Tipped with purple. Plants-----		.25
<u>CRASSULA argentea.</u> "Jade or Japanese rubber plant" Glossy green---\$.10		.25
<u>C. falcata.</u> One of the best. Blue grey matted surface-unique in shape---		.25
<u>C. hemispharica.</u> "Arib's Turben" One of the very rarest and oddest succulents Leaves overlapped like a turban-----		.25
<u>C. imperialis.</u> "Giant Watch Chain"-----		.15
<u>C. perforata.</u> Buttons on a string or Chinese money. Desirable-----		.10
<u>C. tetragona.</u> Tree Type easily rooted brittle-----		.10
<u>C. reseda.</u> Fingered type with red edges nice for hanging baskets-----		.10
<u>COWS HORN.</u> See Euphorbia grandidicornis.		
<u>CHRIST THORN.</u> See Euphorbia splendens.		
<u>ECHEVERIA amaena.</u> Very nice plants-----		.25
<u>E. agavoides.</u> Very nice little plants-----		.25
<u>E. Corduroy.</u> Very pretty plants-----		.25
<u>E. derenbergii.</u> Pale bluish green, translucent as if made of wax.-----		.25
<u>E. micranthos.</u> Lovely red under leaves. Good for gardens-----		.15
<u>E. elegans.</u> Pale bluish green, pink waxen flowers-----		.15
<u>E. glauca.</u> Old time Hen and Chicken. -----		.15
<u>E. kewensis.</u> Very nice plants. beautiful color-----		.25
<u>E. multicaulis.</u> A. charming little Echeveria. Shinning leaves turn red---		.15
<u>E. nobilis.</u> One of the better types. Sun gives its purple covering an amethyst coloring-----		.25
<u>E. peacockii.</u> Gray blue, powdery; like a piece of carving-----		.25
<u>E. pulvinata.</u> Very pretty with red bordered leaves-----\$.15 to---		.25
<u>E. schinckentanzii.</u> Very pretty plants-----		.15
<u>E. schinckentanzii cristate.</u> Very pretty cristate plants \$.15 to-----		.25
<u>E. se-oliver.</u> Fuzzy green leaves-----		.25
<u>E. simulans.</u> Yellow to green leaves with red edges. Plants \$.15 to-----		.25
<u>ELKS HORN.</u> See Hereoda dyeri.		
<u>EUPHORBIA cereiformis.</u> 2 to 3 inch plants-----		.15
<u>E. grandicornis.</u> "Cows Horn" Nice plants \$.25, Larger not prepaid---		.75
<u>E. lactea.</u> 4 to 6 inch plants \$.25, 6 to 10 inch plants -----		.35
Larger starting to branch not prepaid-----	\$ 1.00 to---	1.50
<u>E. mammalaris.</u> Small plants-----	\$.10, Clusters---	.50
<u>E. nirvelia.</u> 4 to 8 inch plants-----		.50

<u>EUPHORBIA offernarium.</u> 3 to 4 inch plants---	-----\$	.50
<u>E. prnithopus.</u> "Hanging Basket Type"-----	-----\$	.50
<u>E. pferschorffii.</u> Small clusters-----	-----\$	.25
<u>E. pseudocactus.</u> "Goats Horn" 4 to 6 in. plants-----	-----\$	.25
<u>E. pseudocactus.</u> 6 to 10 in. plants \$ .35, Large branched not prepaid---	-----\$	1.50
<u>E. polycantha.</u> Clustered plants-----	-----\$	.50
<u>E. resinifera.</u> Clusters redily. Small plants-----	-----\$	.25
<u>E. splendens.</u> "Christ Thorn" Blooming size 6 to 12"plants-----	-----\$	.35
<u>E. tirucalli.</u> "Pencil Tree Type" Fast growing good for back grounds---	-----\$	.25
<u>EAUCARIA bosscheana.</u> Very nice plants-----	-----\$	.25
<u>E. hybrids.</u> Very nice variety of plants-----	-----\$	.25
<u>E. tigrina.</u> "Tiger Jaws" The popular variety-----	-----\$	.25
<u>GASTERALOE hybrids.</u> Nice plants-----	-----\$ .15, larger---	.25
<u>GLOTTIOHYLLUM lingiforma.</u> Very nice plants-----	-----\$	.25
<u>GASTERIA hybrids.</u> "OX Tongue" Nice plants \$ .15 to-----	-----\$	.25
<u>GIANT WATCH CHAIN.</u> See Crassula imperialis.		
<u>GOAST PLANT.</u> See Euphorbia pseudocactus.		
<u>GR PTOPTALUM paraguayense.</u> "Gost Plant" Nice white-----	-----\$	.10
<u>HAWORTHIA attenuata.</u> Very warted, tightly cupped leaves, grows in sun---	-----\$	.25
<u>H. coarctata.</u> Slender and faintly warted, red in sun-----	-----\$	.35
<u>H. cymbiformis.</u> Window Plants. Very light green-----	-----\$	.25
<u>H. fasciata.</u> Striking with warts in distinct bands-----	-----\$	.35
<u>H. marganitifera.</u> Very good. Leathery; heavily warted--	-----\$	.25
<u>HERBEROA dyeri.</u> "Elks Horn" Very nice plants---	-----\$	.25
<u>JADE.</u> See Crassula argentea.		
<u>KALANCHOE fedtschenkei.</u> Violet tinted leaves, very charming flowers. Delicata salmon. A very lovely thing. Keep in the sun-----	-----\$	.10
<u>K. marmorata.</u> Curious, large with large purple spots in profusion-----	-----\$	.15
<u>K. Somaliensis.</u> Curious plants--	-----\$	.15
<u>K. tometosa.</u> "Panda plant" Brown spots on edges of leaves, \$ .25, ---	-----\$	.35
<u>K. thyrsiflora.</u> Looks like a ncheveria. Large gray red tipped leaves covered with powder. blooms creamy in large stalk. Handsome large-----	-----\$	.50
<u>BRYOPHYLLUM daigremonianum.</u> A curious plant, molded leaves-----	-----\$	.10
<u>B. tubeflorum.</u> "Guinea" plants-----	-----\$	.10
<u>B. hybrid.</u> Cross between the above two plants-----	-----\$	.10
<u>KLBINEA acaulis.</u> Nice plants-----	-----\$	.25
<u>K. articulata.</u> "Blue Candle" plant with pretty leaves sprouting from the top Very odd plant-----	-----\$	.15
<u>K. pendula.</u> A closely related plant with red flowers and thick, dark, green stem striped with purple. "Inch Worm"-----	-----\$	.25
<u>K. repens.</u> The smallest of the blue, tublar leaved plants-----	-----\$	.10
<u>K. tomentosa.</u> Rare, pure white---	-----\$	.25
<u>MESEMBRIANTHEMAE aptenia cordifolia.</u> Old fashioned variety, Small, thick green leaves; tiny magenta fls.-----	-----\$	.25
<u>M. types.</u> 5 or 6 heavy clustering types-----	-----\$	.10
<u>M. types.</u> 10 to 12 types of branching flowering hanging basket types---	-----\$	.10
<u>LIVING ROCK.</u> See Plicospiles.		
<u>OX TONGUE.</u> See Gasteria hybrid.		
<u>PHEASENTS BREST.</u> See Aloe Variegata.		
<u>PARROT.</u> See Aloe Variegata.		
<u>PACHYVERIA hybrids.</u> Several types of nice plants each---	-----\$	.25
<u>PLICOSPILOS nelii.</u> "Living Rock" The best of the rocks-----	-----\$	.25
<u>PACHYPHYTUM.</u> Nice plants-----	-----\$	.25

<u>PORTULACARIA AFRA.</u> Nice plants-----	\$ .10
<u>P. afra. variegata.</u> New variegated form-----	\$ .25
<u>P. Anacamperos rufescens.</u> Have leaves in rosettes, often on short stems and have hairs growing from the axils of the leaves or have a cobwebby covering of hairs. Blooms pink-----	\$ .25
<u>RED DRAGON FLOWERS.</u> See <u>Huernia schneideriana.</u>	
<u>SCARLET ALOE.</u> See <u>Aloe hanburyana.</u>	
<u>SEDUM adolphi.</u> Golden yellow, conspicuous-----	\$ .10
<u>S. compressum.</u> Tall Echeveria like rosette-----	\$ .10
<u>S. guatemalense.</u> Green turning to red in sun. Very attractive.-----	\$ .10
<u>S. morganiun.</u> very nice plants. "Burros Tail". Nice hanging basket-----	\$ .25
<u>S. multiceps.</u> Like a little pine tree. Perfect in bowls-----	\$ .10
<u>S. praealtum crest.</u> Nice little crested plants-----	\$ .10
<u>S. pachyphyllum.</u> Pale blue, pink tipped-----	\$ .10
<u>S. stahli.</u> Called baked beans from the resemblance of the leaves-----	\$ .10
<u>SENECIO stapeliformis.</u> Nice plants-----	\$ .25
<u>SPIDER ALOE.</u> See <u>Aloe spinosissima.</u>	
<u>WHIP*POR*WILL.</u> See <u>Aloe Variegata.</u>	
<u>TIGER CACTUS.</u> See <u>Aloe Variegata.</u>	
<u>TIGER JAWA.</u> See <u>Faucaria tigrina.</u>	

STAPELIAE AND ALLIED ASCERPIADS.

<u>CECROPEGIA woodi.</u> "Rosary Vine"-----	\$ .25
<u>C. sandrisonii.</u> Umbrella flower"-----	\$ .50
<u>CARALLUMA europae.</u> Very pretty plant with little purple-red blooms-----	\$ .25
<u>C. lutea.</u> Plant turns brown in sun very pretty flowers yellow-----	\$ .25
<u>DUVALIA modesta.</u> Very curious little plant. chocolate blooms tiny branches. A very odd and rare plant-----	\$ .25
<u>HUERNIA primulina.</u> Yellow blooms, Odd Stems-----	\$ .25
<u>H. schneideriana.</u> "Red Dragon Flower"-----	\$ .25
<u>H. schneideriana Hybrid.</u> Two toned flower-----	\$ .25
<u>H. thureti.</u> Flowers pale green with brown dots-----	\$ .25
<u>PIRANTHUS foetidus.</u> Flowers dull yellow and smell like dead fish \$ .15, \$	\$ .25
<u>STAPELIA cantaberiensis.</u> Very big blooms, about 6 inches purple-----	\$ .25
<u>S. Giganta.</u> Pale purple flowers, marked with crimson lines 14 inches. \$	\$ .25 up.
<u>S. grandiflora.</u> Flowers, 15 inches across very pretty-----	\$ .25
<u>S. hirsuta.</u> Ground red, margin white, petals hairy white-----	\$ .25
<u>S. leendertzi.</u> Very rare-----	\$ .50
<u>S. pulchella.</u> Little beauty. Sulphurous yellow with brown spots-----	\$ .25
<u>S. variegata.</u> "Star Fish" Yellow with small spots-----	\$ .10
<u>S. verrucosa.</u> Very small yellow blooms with tiny Brown dots.-----	\$ .25

Stapeliae and Allied Plants. I have most of these in larger plants if you want large plants send extra money and I will send you a large plant.
